

SPECIFIC - UNSPECIFIC

[MLINSKA ULICA 4]

28.06 to 05.07.2012

Exhibition at the
City Planning Office, Grajska Ulica, 7

A group of 3rd year students at the Technical University Graz, at the **Institute for Architecture Technology** were called to design one or more buildings at **Mlinska Ulica**, which could be **used for either residential or office purposes**. Each unit was required to be readily convertible from office to apartment use and vice versa. A plot ratio $\geq 2,00$ and an open space provision $\geq 50\%$ were specified. In order to stimulate experimental approaches no height limitation was set. The result would be a kind of blank, a base line catering equally for the highly specific requirements of residential units and those of offices and providing a location that is, at least to some extent, thoroughly neutral in terms of use.

Tutors at IAT:

prof. Roger RIEWE
di Ferdinand OSWALD
di Alexandra STINGL
dr. arq. Marisol VIDAL

Guests:

dipl. inž. arh. Stojan SKALICKY
dr. univ. dipl. inž. arh. Kaja POGAČAR
